

Data Integration

Cloudomation Engine provides the tools to break down data silos and merge data seamlessly & reliably.

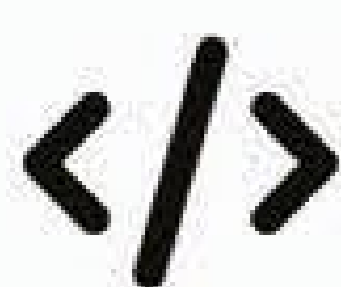

Integration of all systems

Cloud and on-premise systems can be connected using highly flexible connectors that support all standard protocols. Even uncommon, specialised and legacy software solutions can be integrated, enabling the incorporation of data in a wide range of formats.

Flexible with Pro-Code

No low-code approach, but automation with Python. This allows data to be transformed, validated and processed exactly according to your requirements.

Customer-oriented

A dedicated personal contact for each customer, communication on an equal level, with a strong focus on customer needs and rapid implementation of customer requirements.

Customer story

Automatic data transfer from REXX HR to a central data warehouse for a German ERP vendor.

Without Cloudomation Engine: No visibility and possibility to analyse personnel data of 1,200 employees.

With Cloudomation Engine: Automated data retrieval, validation, preparation and loading into a central data warehouse.
